

Amit AI and Prodigy Intelligence Announce Strategic Partnership

January 23, 2025 – Altendorf, CH – Prodigy Intelligence, a trailblazer in next generation machine learning deception detection technology and Amit AI, a European based leader in cutting-edge artificial intelligence solutions, are excited to announce a strategic partnership aimed at accelerating the deployment of AI powered solutions in North America and Europe.

The collaboration combines Prodigy Intelligence’s unparalleled expertise in behavioural patterns analysis, data driven approach, and human behaviour analysis and Amit AI’s expertise in advanced AI models that span multiple sectors, including healthcare, security, law enforcement and corporate investigations.

“This is a strong mutual partnership” said Dr. Matthew Kane, CEO of Prodigy Intelligence. “We believe that the shared learnings between our teams will provide solutions that are more intelligent, efficient and offer actionable insights across numerous industries.”

“This value-added partnership is a testament to our shared vision and commitment to innovation,” said Oliver Haufschild, CEO at Amit-ai. “By working closely together, we can leverage our combined expertise to develop smarter, more efficient solutions that drive meaningful impact across industries. We look forward to the valuable insights and advancements this collaboration will bring.”

Both parties will work together to integrate their technologies, creating innovative AI-based solutions tailored to the needs of their respective markets.

About Prodigy Intelligence:

Prodigy Intelligence fuses the experience of a former spy and academic expertise to create an automated tool that revolutionizes the detection of deception. It provides probabilities of deception in statements over text, audio and video files, automating complex tasks in seconds which usually requires hours of analysis by skilled investigators.

About AMIT AI:

AMIT AI develops advanced AI pre-diagnosis solutions that analyze text, audio, and video to extract actionable insights. Our technology automates complex analysis in seconds, enabling businesses to detect patterns, assess risks, and make data-driven recommendations with greater accuracy and efficiency. In the healthcare sector, AMIT AI enhances diagnostics and patient care by providing intelligent, data-driven support for medical professionals.
